

The Child Population Expansion indicates a stable or declining population. The Child Population Expansion for Kinston is .840, however, there are enumeration districts within the corporate limits of Kinston which reflect a replacing population. These enumeration districts which have a 1.000 or more are Enumeration Districts 16, 22, and 26. Enumeration Districts 16 and 22 are predominately white enumeration districts with enumeration district 26 being an area with 62.5% of the population black. The lowest Child Population Expansion ratio is in Enumeration District 21, an all white area with a high elderly population of 18.37%. (Map D shows the location of enumeration districts.)

There is only one area of Kinston that approaches a 50-50 black to white population. That area is Enumeration District 26 with 62.5% of the population being black. All other enumeration districts reflect a lopsided racial balance, which gives some impression that integration is not the case in Kinston just as in most other cities.

In analyzing the population within the corporate limits of Kinston, it is desirable to identify as much of the population as possible for the purpose of determining changes in various segments of the population. The following table indicates 1950 and 1970 population by ages, sex and race.
